Experienced Tutor at Ethan Teaches Maths

- Experience teaching Mathematics and Further Mathematics at both GCSE and A-level
- Spent a summer volunteering to train young teachers in India
- Regularly leads reading groups at institutions of higher education

“My goal is to give students the tools to tackle tough mathematical problems by themselves. The first step is to get a sense of where each individual’s strengths & weaknesses lie, so that I can design a course of study that fits them. Then, after some explanation of the methods and principals involved, the bulk of the lesson will be working together through a tailor-made set of practice questions. My university lecturer used to say ‘Maths is not a spectator sport’, and we’ll be playing on the pitch from day one.”

“Joseph was a tremendous help to my daughter with her Further Maths A Level. He explained highly complicated Group Theory and Number Theory concepts to her in a very clear way and significantly improved her understanding. He has an approachable and friendly manner, and I would wholeheartedly recommend him.”

- Susannah, Parent

“Joseph has tutored two of my sons, and not only did their grades see stark improvements, but they started to show significantly more interest in Maths. He clearly loves to help others develop and succeed, and is extremely patient and understanding as a tutor.”

- Debbie, Parent

Total hours worked: **400+**

At Ethan Teaches Maths, our tutors work to provide students with exceptionally crafted lessons and tailored resources. We see tutors as partners in our students’ long-term educational success.
